Technical Skills

Frontend: React, Angular.js, Vue.js, JavaScript, HTML5, CSS.

Backend: Spring Boot, Java, Python (Django).

Database & Integration: PostgreSQL, MySQL, REST API, ORM, SQL queries.

Tools & DevOps: Git, Docker, CI/CD, Vercel, Railway, Android Studio.

- Languages:**
- English: Intermediate (Fluent reading, writing, and technical conversation).
 - Spanish: Native.

Antonovich Martín Uriel

Software Projects & Academic Experience

- Personal & Freelance Projects:**
 - Equine Therapy Management System (CEDICA): Developed a custom management platform to streamline employee tracking, service provisioning, and patient communication. (Te sugiero agregar aquí: "Built with [Tecnología 1] and [Tecnología 2]")
 - Veterinary Clinic ERP: Built a comprehensive system encompassing appointment scheduling, digital medical records, and community-facing web services.
 - Full-Stack Web Apps: Engineered applications integrating relational databases (PostgreSQL, MySQL) via ORM tools and RESTful APIs.
 - DevOps & Deployment: Automated deployment workflows implementing CI/CD pipelines for continuous delivery.
- Proyectos Universitarios (Facultad de Informática UNLP):**
 - Project Lead / Coordinator: Orchestrated full-stack application development within simulated agile work environments. Managed the entire software lifecycle: from client requirement gathering and system design to deadline management and final product delivery.
 - System Integration: Supervised the integration of multiple software modules across staging and production environments.

Current Roles

- Full-Stack / Frontend Developer | Escribanía Sureda-Antonovich
 - Developing a comprehensive end-to-end web application using React and Spring Boot.
 - Designing a reactive user interface, defining the brand identity, and creating the corporate logo to establish a strong digital presence.
- Health Data Analyst
 - Leveraging artificial intelligence for image recognition systems in projects for industry-leading companies such as Johnson & Johnson, Takeda, Edwards, and Alcon.

About Me

Proactive and responsible Full-Stack Developer with a strong focus on Frontend architectures. I am passionate about building responsive user interfaces and continuously exploring new frameworks to deliver comprehensive software solutions. I thrive in collaborative environments but also possess the autonomy required to drive individual projects from conception to deployment.

Previous Work Experience

- Business Owner & Manager: Founded and managed a tea shop venture, handling nationwide import, wholesale, and retail operations.
- IT & Community Manager: Managed IT systems maintenance and social media presence for DVR.
- Administrative & Real Estate: Handled consortium administration and customer service within the real estate sector.

Education

- B.S. in Computer Science (Licenciatura en Sistemas) - UNLP (Over 50% completed)
- B.S. in Electronic Engineering - UNLP (Over 50% completed)
- Programming Analyst - (One course remaining to graduation)
- Educational training in Leadership.
